

Mississauga Halton LHIN

Mississauga Halton LHIN

Proposed local integration priorities 2010-2013

Improving Access, Quality and Sustainability of the Health System

Reduce Emergency Department wait times.

Improve appropriate use of hospital beds through improved utilization and creating community capacity post hospital care — ALC.

Creation of new and innovative LHIN-wide “centres of excellence” to improve access, quality and safety.

Implement local LHIN wide solutions to provincial priorities in such areas as critical care and wait times for identified services.

Integrate “back office” functions across all sectors to create a more efficient health care system.

Enhancing Seniors’ Health, Wellness and Quality of Life

Optimize and increase community capacity to manage services for “at risk” seniors in their homes and community

Improve access to, and coordination of, specialized geriatric services for frail seniors with complex health needs.

Determine the future capacity needs and a long term plan for Long Term Care home beds and services.

Integrating Mental Health and Addictions Services

Create and implement multi-service centres to enhance integration across the LHIN.

Improve community mental health supports to ensure appropriate use of Emergency Room services and reduce re-admissions to hospitals.

Prevention and Management of Chronic Conditions

Improve access to an integrated diabetes prevention and management program consistent with the provincial chronic disease prevention and management framework.

Develop a local integrated approach for prevention and management of chronic kidney disease.

Empower residents to manage their chronic conditions.

Proposed local integration enablers 2010-2013

Primary Health Care
