

News from Your Local Diabetes Educators

WELCOME to the first regional diabetes newsletter!!

This is a collaborative initiative by the diabetes programs in the Mississauga Halton Local Health Integration Network (LHIN).

The purpose of this newsletter is to update physicians and healthcare professionals in our community about new diabetes initiatives in our LHIN & province.

THANK YOU for your continued support and referrals to our local diabetes programs and we look forward to working with you in 2010!!

Common Diabetes Referral Form

- **We hear you!** Physicians have been asking for years about a common referral form for diabetes and we are working towards launching one soon.

Pilot Diabetes Teams

- We are excited about a new pilot program in our LHIN that will make it possible for a nurse & dietitian team to provide services for people with diabetes within physicians' offices.
- A diabetes team may be eligible to come to your office 1-4 days per month, depending on patient volumes.

 ***If you are interested in participating in this outreach program please complete the attached expression of interest or click on the link to [Expression of Interest](http://www.mississaugahaltonlhin.on.ca) or go to www.mississaugahaltonlhin.on.ca before December 21st, 2009.***

Baseline Diabetes Dataset Initiative (BDDI)

- Ontario has launched the BDDI. This initiative will identify Ontarians with diabetes and match them with their primary care provider. The BDDI will be used to populate the diabetes registry, provide physicians with a report on timeliness of tests such as HbA1c, LDL and retinal exams and for population-based planning for diabetes services in our LHIN.

Local Diabetes Programs

- **Please find attached** — a list of the local diabetes programs and the populations they serve.
