

Partnering for a Healthy Community

Integrated Health Service Plan
At a Glance **2016-2019**

The Mississauga Halton Local Health Integration Network (LHIN) 2016-2019 Integrated Health Service Plan (IHSP) is the fourth strategic plan developed by the Mississauga Halton LHIN.

It builds off the successes and lessons learned over the past 10 years when LHINs were first established, and leverages the strengths of local collaborative, innovative leaders and partners.

The plan represents the voices of our citizens and what is needed to build a stronger system of care that focuses on the needs of the diverse people living in our community, including our Francophone and Aboriginal residents.

Three key priorities have been identified:

CAPACITY

Required resources,
now and for the future

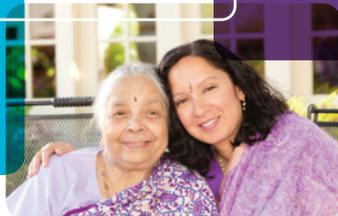

Partnering for a Healthy Community

ACCESS
Health care
when and
where you
need it

QUALITY

Positive person experiences and
outcomes across the care continuum

Focusing our attention on specific areas is important.

In alignment with the provincial and pan-LHIN direction, the 2016-2019 IHSP identifies three areas of focus, with specific goals and strategies for the defined priorities:

		PRIORITIES		
		ACCESS	CAPACITY	QUALITY
AREA OF FOCUS	 Home & Community Care	Bring care closer to home	Quantify capacity needs and expand supports to care providers	Ensure the needs and voice of the patient and their family shape how services are delivered
	 Coordinated & Integrated Care	Integrate and partner to improve access and services through coordinated efforts	Enhance program capacity to support the right care in the right place	Coordinate and integrate care with the person at the heart of the health care system
	 Population Health	Make it simpler to navigate the health care system and reduce barriers to access	Recognize and address the impact social determinants play in building a sustainable, person-centred health care system	Foster a culture of health and community wellness

The Mississauga Halton LHIN 2016-2019 Integrated Health Service Plan offers new approaches to challenges in our existing health care system.

It presents new ways of thinking, recognizing those aspects that impact an individual's health status must be looked at if we are truly trying to improve our residents' health and put patients first. We will monitor our progress and be flexible in our approach to meet the changing needs of our residents. Our plan is ambitious, yet realizable, and it clearly supports our approach of *Partnering for a Healthy Community*.
